- 1. A flexible magnetic layer based rubberized mat comprising:
 - a layer of a flexible magnetic composition;
- a layer of an adhesive composition on said magnetic composition; and
- a layer of a rubberized composition on said adhesive composition;

whereby the layers of the magnetic composition, the adhesive composition and the rubberized composition form a unitary flexible mat for use on metal surfaces.

- 2. The mat according to claim 1, wherein the layers of the magnetic composition, adhesive and rubberized composition are coextensive in area.
- 3. The mat according to claim 1, wherein the rubberized composition is neoprene rubber.
- 4. The mat according to claim 1, wherein the rubberized composition is rubberized plastic.
